**Seminar on
“Lantau Tomorrow – Is it A Great Vision?”**

Mr Robin K. B. LEE, Head of Sustainable Lantau Office,
Civil Engineering and Development Department

Date: 27 November 2018 (Tuesday)
Time: 6:30 to 8:00 pm
Venue: Lecture Theatre No. 4, City University of Hong Kong

Synopsis

Lantau is a double gateway to the World and the rapidly growing Guangdong-Hong Kong-Macao Greater Bay Area. Taking this strategic locational advantage, Lantau and its adjoining areas offer tremendous opportunities to meet challenges of Hong Kong, such as high demand for housing land and quality living environment, traffic congestion in between New Territories and urban area, inadequate social welfare facilities particularly for the aging population, lack of solution space for urban renewal and keen global economic competition etc.

Chief Executive announced Lantau Tomorrow Vision in her 2018 Policy Address. It propels the following five policy directions in developing Lantau:

- ✧ unleashing land potential, increasing land supply and developing a liveable near carbon-neutral city;
- ✧ according priority to transport infrastructure, reinforcing advantages of a “Double Gateway”;
- ✧ developing the aerotropolis and the third Core Business District to promote economic development;
- ✧ enhancing environmental capacity for sustainable development; and
- ✧ increasing leisure and entertainment facilities to promote a healthy lifestyle.

While some consider Lantau Tomorrow a visionary plan guiding the sustainable growth of Hong Kong in the future 20-30 years, some others criticize it as a White Elephant. Let’s have an evidence-based discussion on Lantau Tomorrow in the upcoming Seminar.

Enrollment through website:

http://ev.hkie.org.hk/en_it_events_inside_Upcoming.aspx?EventID=961&&TypeName=Events+%2f+Activities Successful applicant will be informed by email three days before the event.
