“Carbon Neutrality Campaign” is the first public education and social mobilisation program that promotes practical and sustainable low-carbon living, focusing on clothing, food, living, and transportation. It is funded by the Environment and Conservation Fund, organised by the Hong Kong Women Professionals and Entrepreneurs Association, and implemented by the Hong Kong Productivity Council. The program aims to raise public awareness on carbon neutrality, encourage individuals and organisations to reduce their carbon footprint and promote behavioural change about sustainable development in the society.

The program will provide a series of capacity building activities, including workshops and seminars, carbon reduction competition and an online carbon footprint tracking platform, to enhance public awareness and capabilities in carbon reduction and promote positive behavioural changes towards achieving carbon neutrality. The program will run for one year with a target of engaging over 8,000 participants in the competitions and activities. There will be fabulous prizes for the competition, for both individuals and teams categories.
