Referred from Supporting Org./Partners: HK\$ 250

Networking Lunch: HK\$ 300 per day

Networking Dinner: HK\$ 500 per day

The conference aims to promote SME growth (and in turn, job creation) through value creation by commercialisation of intellectual property (IP). It is a concept that lacks understanding in Asia. However, we believe that Hong Kong has the potential to be a world-class international intellectual property commercialisation centre for the global market.

All developed economic systems around the world are currently progressing towards a knowledge-based economy. As the renowned Asian international financial centre and RMB offshore centre, with a sound legal framework for IP protection and litigation, Hong Kong is in the perfect position to become an international hub for IP commercialisation. The aim of the conference is to advance Global-Hong Kong cooperation and build the necessary infrastructure and ecosystem to facilitate global IP commercialisation.

Experts will share their insights into:

1. IP valuation,
2. Technology transfers,
3. International mergers and acquisitions, and
4. IP quality improvement.

The conference will also introduce the latest developments in IP financing, IP standardising methodologies and provide viable solutions to Hong Kong industries, bankers, investors, entrepreneurs, inventors and IP professionals. After the conference, Developmental Working Groups will follow up the discussions, aiming to formulate and promote best practices, guidelines and standards for IP business activities under an international cooperation framework.
